

Bristol Warren Regional School District

INTERNSHIP OPPORTUNITIES

Developing Career and College Readiness

After her internship at East Bay Manufacturing, Teagan was offered a full-time position and assistance with college tuition.

GET INVOLVED

Students can check in with their guidance counselor or teachers for internship opportunities.

The process includes site visits to local businesses, developing a resume, completing and application, and interviewing for a position you are interested in. Internships run from 50-100 hours afterschool or during the school day if the schedule permits. Students complete weekly timesheets, present their learning at the end, and may earn course credits.

Local businesses can contact the Superintendent's office if they would like to develop an internship partnership or offer other career awareness opportunities such as job shadowing or mentoring.

During the 2015-2016 school year, the district partnered with the following businesses to offer internships in engineering and business:

- East Bay Manufacturing
- WaterRower
- TriMack Plastics
- Jade Plastics

Internships provide opportunities for student to...

- learn about the skills and knowledge needed within different career paths
- apply content learning to real world problems
- develop skills such as communication, collaboration, critical thinking, and problem solving
- acquire work habits such as commitment and perseverance, and gain confidence and a sense of accomplishment.

Internships provide teachers with...

- an inside look at what businesses are looking for
- information to keep their programs current and aligned to industry standards,

Internships support the community in...

- understanding the potential of a younger generation
- meeting labor demands of the local economy
